PARASOL

FABRICS

WHY
SOLUTION
DYED!

The best known solution dyed fabrics on the market are made of acrylic, but that doesn't make them better. Actually acrylic is inherently weaker than polyester, with polyester having both a higher specific gravity and tenacity strength.

This results in significantly higher tensile strengths, tear strengths and abrasion resistance. The polyester used in DURASUN™ is a filament yarn instead of a staple yarn, thus making it even stronger. Using polyester gives you double the strength benefits. However, not all polyesters are created equal.

Yarn density (sometimes referred to as Denier) is also important. A polyester yarn of equal density to an acrylic yarn will be stronger. Also, a higher density polyester yarn will be stronger than both a lower density polyester yarn or a lower density acrylic yarn.

Don't be fooled by the talk that “polyester won't last”. In the old days, that was people referring to coated polyester fabrics losing their color. Now it is people referring to smaller denier polyesters that don't have the beefiness and longevity of DURASUN™

ACRYLIC VS. POLYESTER

- ▶ DURASUN® is a 100% solution dyed polyester fabric with a fluorocarbon finish, resulting in a fabric that is breathable, reversible, water repellent and has a luxurious hand. Because the yarn is solution dyed, color fastness is exceptional..
- ▶ DURASUN® is the ultimate fabric that combines strength, abrasion resistance, dimensional stability and UV resistance
- ▶ DURASUN® can be used for many outdoor applications such as marine tops, trailer covers, awnings, gazebos, canopies, patio furniture and anywhere that a reversible and breathable fabric is needed.
- ▶ DURASUN® can be used for many outdoor applications such as marine tops, trailer covers, awnings, gazebos, canopies, patio furniture and anywhere that a reversible and breathable fabric is needed.

COLOR RANGE

DURASUN™ is a solution dyed polyester fabric won't fade and provides superior strength compared to other solution dyed fabrics. Because of this, it is ideal for any application.

Other benefits include:

- ▶ Colorfast and UV resistance
- ▶ Stronger than acrylics
- ▶ Better abrasion resistance than acrylics
- ▶ Keeps appearance for years
- ▶ Dimensionally stable, won't sag or stretch
- ▶ High water resistance
- ▶ Mildew resistant
- ▶ Protected by a 8 year limited warranty

BENEFITS

► **Durafil Teknik Tekstiller Sanayi ve Ticaret A.Ş.**

► Hadımköy Mah. Celal Bayar Cad.No:1 Arnavutköy

► 34555 İstanbul , Türkiye
